

Experiential Tarot

Many of us are drawn to the images of Tarot but become overwhelmed or confused by the contradictory interpretations contained in numerous Tarot books. The superficial portrayals of Tarot on TV or in the movies also make us second-guess our yearning to work with the Tarot cards.

Key to understanding the Tarot is to internalize it and EXPERIENCE the Tarot to uncover the many layers of meaning and wisdom. Whether you are new to Tarot or have been working with Tarot for years, EXPERIENCING the Tarot creates deeper knowing while revealing different nuances each time a card is explored. Join us as we explore various approaches that can be used with any Tarot deck.

After participating in this highly experiential workshop, you will be able to use the following techniques to bring forth powerful insight, possibility, and creative potential:

- Embodiment process
- Movement
- Dialogue
- Story
- Symbol
- Animation (the Tarot cards “coming to life”)
- Three-card spread and a yes/no spread

We will be working with the Rider-Waite-Smith deck in this workshop. However, these techniques can be applied to ANY Tarot deck after the workshop. Please bring a Rider-Waite Tarot deck (also known as Universal Waite or Waite-Smith), a notebook, pen, and a spread cloth (if you have one) with you to the workshop.

Daniel Johnson, M.S., is an [Evidential Medium](#) and Certified NeuroTransformational Coach who integrates aspects of the body, mind, and spirit in his readings, award-winning workshops, and coaching practice. Trained in Gestalt theory as well as corporate talent development, Dan has conducted workshops internationally as well as at local Spiritualist churches. His work has led to appearances on local CBS television, radio, and the “Another Way” television show. Dan currently hosts the [Spirit and Energy Podcast](#) featuring interviews with experts on energy, intuition, and spirituality.

Manifesting With The Chakras

The universe is made of energy. The life force energy within us has 7 energy centers or chakras. In this energetic world, how do we work with our own energy centers to manifest what we want? How do we align with energetic principles to create something tangible from pure energy? And what role does the brain and our thoughts have in this process?

Join us in this fun and experiential workshop where we explore the energy of each chakra and key energy concepts such as Resistance, Surrender, Rhythm, Integration, Resonance, Attachment, and opposing energetic forces. We'll learn ways of creating from each of these energy centers as well as ways to "clear up" what may be holding us back. We'll also look at the impact our brain has on our energy and level of consciousness.

After participating in this workshop, you will be able to:

- Describe each of the seven energy centers and their role in manifesting
- Apply specific techniques that activate the energy of each chakra center
- Clear limiting beliefs and unwanted patterns
- Integrate new beliefs using neuroscience-based tools and techniques
- Align the energy of your thoughts with chakra energy to manifest more quickly and effectively
- Create your life from the inside out

Please bring a notebook, pen, and different-color markers or crayons to the workshop.
